

## **Important information for patients seen at Children's Medical Group prior to July 2014**

Children's Medical Group of Orange County (CMGOC) has transferred all of our **electronic records** to Morgan Records Management , but please be aware that we had paper charts until July 2014. After we switched to electronic records, we scanned many of the paper charts into the electronic record system. However, we were not able to scan all of the paper charts.

If the patient was seen at Children's Medical Group of Orange County prior to July 2014, they may have paper records at another location. To find out about this, please contact CertifiedUSA, a medical records company in California that is managing the paper charts. You may call them at 562-949-4930 or email them at [brian@certifiedusa.net](mailto:brian@certifiedusa.net)

Thank you once again for allowing us to have served you.
